B.TECH

Mechanical and Automation Engineering
Maharaja Agrasen Institute Of Technology

08/2017 - 08/2021   *8.00 GPA*

WORK EXPERIENCE

Software Engineer
Fininfinity Technologies Pvt Ltd.

01/2022 - Present   *Gurgaon,Haryana*
Provides easy access of financial products to people through the digital world

Achievements/Tasks

- Designed, implemented, and tested **Flutter** and **Dart** code for IOS, Android.
- Contributed in making of **custom templates** to create form and pages with the help of **JSON data** instead of writing static pages for each individual page.
- Used **GetX state management** framework in flutter for state management and made animation views using Lottie packages.
- Wrote several **stories** for testing different components and pages using **Monarch**.
- Handled the development of Admin Dashboard and implemented several features such as updation, deletion, addition of DB records. for the complete Application. Tech stack used :- **React, Redux, Saga, React-bootstrap.**
- Implemented **health checker** which tells us about the health % of all the services used in the backend.
- Worked with Node js. to develop APIs which assist in making the web application.
- Worked with several **React** tools to develop web pages, components and other user interactive pages to assist several teams.
- Developed several services and pages with the help of pure **HTML** and **CSS** for several business requirements

SKILLS

Flutter   Javascript   React   HTML   CSS

Dart   Wordpress
